What is ImageNomic Portraiture 3? Developed and released by Imagenomic, portraiture 3 is a program to enhance your digital portraits through the use of various colour correction and skin retouching tools. This photo editing software is powerful, easy to use and provides professional results with minimal training. Additional features include; an auto-healing brush for removing blemishes such as spots and wrinkles, as well as a skin smoothing tool that minimizes pores and removes cellulite. Furthermore, the program has been designed with a number of sophisticated controls allowing you to adjust contrast or change saturation to modify colours in your images.
