Day 4
I decided to set up a diary. I feel that this is the basic thing to keep my mental in place. I do not know what to do. I'm shaken. I'd love to come back home, but I have to put myself together. The basis is to save energy. I can not fish and fish on the same day. I have been left with fuel for a few days. And it will be best if after doing what I have to go to sleep right away.

i really liked this game but it needs a lot more work and because you die sometimes for no real reason i give it a negative sry.... One of the most terribly designed games ever. User interface is absolutely the worst.. One of the most terribly designed games ever. User interface is absolutely the worst.. Twice I packed the stuff and got lost at sea... Twice I had over half in both hunger and thirst when my character suddenly decided to die after 10 days. This game lacks tutorial or some sort of explanation to inform the players how to play or even how they died.. I did not enjoy this game. The gameplay is confusing and doesn't seem completely functional. The tutorials are not helpful and the food and water systems are completely random. The controls are weird and getting off the boat to explore means no guarantee of getting back on it again. The game is an interesting concept, but I can't recommend it in it's current state. It needs some serious work for it to be worth the money you have to pay for it.. Maybe I don't get this game, but neither does my friend. I'm dying even though my stats are good... Seems very early, might be a decent game with a ton of polishing. They need to get rid of the mouse wheel selection and go to a normal drop down mouse style. I guess it's a alright game for under 4 dollars, but it really needs some better interaction and content. The swimming system is also absolutely stupid. I should say mash a bunch of keys over and over if you walk into the water... I bought this game for decently cheap in the Autumn sale because I thoroughly enjoyed the premise of the game. I've always wanted a game of this style, the whole survival at sea, but not many games I've seen have done it the way I specifically wanted, and this game is the closest I've seen yet. It may be a little buggy, and suffers from some common new developer issues, but I see great potential in this game. I would love to see it be frequently updated to a point of genuine game-age.

4V5, minus the single point for general clunkiness, plus the four for the premise and general execution. Well done.
